

ORGYL KC

Orgyl KC is a cationic fixing agent, free from formaldehyde, which improves the fastness properties of anionic dyes.

Aspect : Yellowish liquid
Basis : Cationic polyamide
Charge : Cationic
pH : In 10% aqueous solution, 4.5 – 5.5

PROPERTIES

Orgyl KC has a strong cationic polarity and a fixing agent recommended for the post treatment in dyeing process.

It is recommended to use in a separate bath at the end of the dyeing process.

Advantages of **Orgyl KC**:

- Free from formaldehyde.
- No influence on shades.
- No influence on light fastness.

APPLICATIONS

Generally 0.5 to 3.0% of **Orgyl KC** diluted with 3 times water is necessary, depending on dye nature and shade intensity.

After normal dye fixation with formic acid, use a fresh bath – (% based on wet blue weight)

150.0%	Water	
0.5 – 3.0%	Orgyl KC	
0.5%	Acetic acid	run 20 min

SHELF LIFE

Orgyl KC has a shelf life of one year if it is stored in its original sealed package. Drums should be tightly resealed each time material is taken from them and their content should be used up as soon as possible after they have been opened.
